

WHEAT

WHEAT CULTIVATION

Wheat needs timely and balanced nutrition to support strong tillers, healthy spikes, and uniform grain development. SMIDI solutions help maximize yield and grain quality.

ESSENTIAL NUTRIENTS FOR WHEAT

- **Phosphorus (P):** Enhances root growth
- **Potassium (K):** Improves grain filling and stress tolerance
- **Sulfur (S):** Improves protein quality
- **Micronutrients:** Support crop vigor

KEY ADVANTAGES:

- Strong tiller formation
- Improved grain size and weight
- Better grain quality
- Higher yield potential

SMIDI FERTILIZER

WHEAT

RECOMMENDED SMIDI PRODUCTS FOR WHEAT

- SMIDI NPK 20-20-20
- SMIDI SOP
- SMIDI Calcium Nitrate
- SMIDI Complete Micro Mix

NUTRITION BY GROWTH STAGE

- **Early Growth:** Balanced NPK
- **Tillering:** Nitrogen application
- **Grain Filling:** Potassium and sulfur

Grow Quality Wheat with SMIDI Fertilizers

Targeted nutrition solutions for better yield, quality, and profitability Wheat cultivation.
